Mark Wilson

Chief Operating Officer,
Tribal

”

“We loaded the UCAS data into SITS within 23 minutes – something that previously took hours to complete.”

”

“Given the complexity of the migration and the number of different parties involved, this is a phenomenal achievement and a testament to excellent collaboration and project work.”

”

“After the Cloud Discovery Workshops, the project had very a quick turnaround - from Jan 21 to a summer go live.”

comments

”

I use the timetable
everyday, but can it
go straight to the day
view, instead of the
month?

”

It's really useful to
have the timetable
and emails in one
place

”

I love the King's Food
page!

”

The app is very
convenient with
KEATS, timetables and
links to the website
together

”

I don't have to open 25 tabs at once - I use emails,
timetables all the time and don't need to keep logging
in. It's so good because usually when I can't find things, I
just give up looking!

Thank you
